Copy 9 of 9

14 March 1969

MEMORANDUM FOR: Deputy for Operations, OSA
Deputy for Research and Development, OSA

SUBJECT: [REDACTED] 6 March 1969,
Overhaul of Delta III S/N 5 Camera.

REFERENCE: Telecon [REDACTED], Headquarters,
[REDACTED] Delta III Camera Repre-
sentative.

1. Recently Delta III Camera S/N 2 was returned to
[REDACTED] as no longer required at that location.
Operational problems were encountered at [REDACTED] however
could not be duplicated by [REDACTED] flights. (Attachment 1)
Delta S/N 2 is now O.R. at [REDACTED]

2. Delta III Camera S/N 3, at [REDACTED] was swapped
for S/N 5 at [REDACTED] S/N 5 has considerably more operational
time than the other cameras as is indicated in performance
data (Attachment 1).

3. S/N 2 and S/N 5 will be maintained at [REDACTED] in
O.R. condition; however, due to operational time on S/N 5
it is anticipated that this camera will be marginal O.R.
until such time as camera receives an IRAN. In reference
telecon [REDACTED] indicated IRAN of S/N 5 would cost from
[REDACTED] pending condition of camera from best
condition to worst. Request your comments:

A. Delta III S/N 5 should receive IRAN

B. Delta III S/N 5 be maintained as "on the
shelf spare" and used as backup in operational
condition as is.

[REDACTED]
Deputy for Materiel, OSA
